- Contract planting
- Large scale restoration projects

## KATMANDOG

About us:

We are proud Wellingtonians who love our city and all it has to offer. Each of us brings something a bit different to the work we do. We like using natural products to create special places. Sometimes with a bit of “quirky” thrown in. Whether it’s a coastal setting, lush bush or a hilltop with a view we enjoy getting stuck in and creating a landscape that fits with the environment and will bring pleasure to the owners.

## KATMANDOG

Landscape Services

Eco-Gardens

If you’re wanting to provide a place for some of our native birds and lizards we have the expertise to help you create garden environments that offer perfect habitat that will allow them to flourish.

# KATMANDOG ECO - GARDENS

Let's give nature a hand!

Our Eco-Garden services will transform your property into a haven for some of New Zealand's amazing native species. Skinks, Geckos, and all types of birds benefit from a helping hand when it comes to finding somewhere to live. We make it easier for them and a pleasure for you..

In New Zealand we are lucky to have a diverse range of native creatures living in our back yards. Unfortunately, much of the natural habitat that these creatures call home is rapidly disappearing.

By providing a specially constructed Eco-Garden you can help restore the balance and enjoy bringing some of these creatures back into your neighbourhood.

We will visit your property and discuss with you what you want to see in your garden and how you might achieve it with selective planting and landscaping works.

We have over 34 combined years of experience in the landscape industry. Over that time we have developed great relationships with nurseries and suppliers. And that means we can get things done quickly! For you!!

## FIRST STEPS

Nearly all of our native animal species have particular plant types that they prefer as habitat.

Our "First Steps" service will provide a range of these plants as the first building blocks for completing a successful Eco-Garden.

## THEY WILL COME!

As well as specific plant selections we can provide a range of hard landscaping options that will encourage many of your native species to call your garden home. We make use of a range of materials that are proven to attract a diverse range of creatures by creating a complete eco-system.

## THE PLATINUM TREATMENT:

Once your Eco-Garden is up and running we can provide a range of management services as required. Weeding, general maintenance, pest trapping and more! This can be an ongoing service or as requested. You decide.
